DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 and 17-42 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's claimed invention discloses a method and device for authenticating an optical channel by modulating optical pulses corresponding to a first bit sequence based on a second bit sequence, transmitting the optical pulses over an optical channel; receiving the modulated optical pulses; demodulating the received optical pulses using the second bit sequence and authenticating the optical channel based on a number of bits from the first bit sequence that are correctly received and demodulated. The prior art of record discloses a similar method and device; however, the prior art does not disclose deriving the first and second bit sequences from a message authentication code, wherein the message authentication code is calculated based on a block of text. For these reasons claims 1-15 and 17-42 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
